SUMMARY

Final-year B.Tech Computer Engineering student with hands-on experience in full-stack development using React.js, Node.js, and Python. Built AI-powered projects in facial recognition, NLP-based sentiment analysis, and smart recommendation systems. National-level coding competition achiever with strong problem-solving skills, seeking a software developer role to contribute to innovative product teams.

EDUCATION

R. C. Patel Institute of Technology, Shirpur, India

Bachelor of Technology - Computer Engineering; CGPA: 7.76

Oct 2022 – June 2026

R. C. Patel Junior College

Senior Secondary (HSC); Percentage: 89.67%

June 2020 – May 2022

SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, HTML, CSS
- **Technologies:** React.js, Node.js, Tailwind CSS, Flask, NLTK
- **Tools:** Git, GitHub, Vercel, VS Code
- **Databases:** MySQL, MongoDB
- **Soft Skills:** Leadership, Teamwork, Problem-Solving, Time Management

ACHIEVEMENTS

- **First Runner-up** at Converges 2025 (National Tech Fest) for *SQUID_MAZE* – Led the team and solved 10+ coding and debugging challenges in 3 hours.
- Completed **CodeChef's Problem Solving and Algorithm Thinking Program**.

PROJECTS

• Secure E-Voting System with Facial Recognition using AI

Tech Stack: React.js, TypeScript, Node.js, Express.js, Supabase, face-api.js, Gemini API, Tailwind CSS

[\[GitHub\]](#)

- Built a secure full-stack digital voting platform with biometric authentication using face-api.js and encrypted facial embeddings (AES-256).
- Implemented tamper-proof vote integrity using SHA-256 hashing with a unique voter_id + election_id composite key, preventing duplicate votes, and integrated JWT-based authentication with bcrypt password hashing for role-based admin and voter access.
- Developed an admin dashboard with real-time analytics and integrated AI (Gemini API) along with OTP-based verification for enhanced security.

• Hotel Reviews Analysis Using AI

Tech Stack: Python, Flask, NLTK, Pandas, Matplotlib, HTML, CSS, JavaScript

[\[GitHub\]](#)

- Built an AI-based web application analyzing 1,000+ hotel reviews from a Kaggle dataset using NLP-based sentiment analysis.
- Implemented an end-to-end analytics pipeline covering data cleaning, preprocessing, model evaluation, and insight extraction to measure customer satisfaction trends.

• BookNest

Tech Stack: React.js, Tailwind CSS, MySQL, Google Books API

[\[GitHub\]](#)

- Developed a smart bookstore application recommending 1,000+ books using the Google Books API.
- Implemented dynamic filters and genre-based search functionality, improving search accuracy by 50%.

CERTIFICATIONS

- **Employability Skill Development (Java, Python, SQL and Soft Skills):** RPG and Zensar Technologies
- **Code Without Barriers:** Ratan Tata Maharashtra State Skill University
- **Web Development:** Udemy
- **Python Programming:** Udemy
